#### NOTE

- 1/ The Bank calculates the commission at the beginning of the first business day of each calendar year and charges the commission within 30 days from that date,
  - 2/ the commission is calculated based on the positive difference between the sum of positive balances at the beginning of the first business day of a calendar year and the average sum of positive balances for the period of two months (November and December) of the previous calendar year. The sum of positive balances is a total of positive balances in all current accounts, auxiliary accounts, Auto Overnight – automatic deposit accounts or Auto Overnight – Automatic Overnight Deposits, and in term deposits held with the Bank,
  - 3/ we charge the commission if the positive difference referred to in (2) exceeds PLN 20 million,
  - 4/ to calculate the total balance, we add up the positive balances of accounts, Auto Overnight deposits and term deposits maintained in currencies other than PLN, and convert the balances in other currencies into PLN using the average exchange rate from the applicable Table of Exchange Rates of mBank S.A.,
  - 5/ if the Client entered into more than one current account agreement or auxiliary account agreement with the Bank or entered into an agreement on Auto Overnight – automatic deposit account or Auto Overnight – Automatic Overnight Deposit (one or more) with the Bank, or at least one term deposit agreement, we calculate and charge the commission on the basis of only one current account agreement or auxiliary account agreement or term deposit agreement with reference to the aggregated positive balances of accounts maintained under all such agreements.
48. Early withdrawal of a term deposit - % of the withdrawn amount, calculated from the deposit withdrawal date until the planned expiry date – does not apply to term deposits opened in the FX mPlatform module in mBank CompanyNet or by phone during a call with an FX dealer
